

The human remains and associated funerary objects include three bone fragments and thirty five beads. Hood Museum records indicate that these items were collected from "an old grave" on the edge of Tetlin Village by Robert A. McKennan. No known individuals were identified.

All of the items described above were collected by the anthropologist Robert A. McKennan in 1929–30 from Tetlin Village, Alaska. McKennan describes the excavation of these remains and funerary objects on page 146 of his 1959 monograph *The Upper Tanana Indians* (Yale University Publications in Anthropology, #55). He attributes the burial to the post 1870 period based on the position of the body and the artifacts associated with the burial and the location of the grave site.

Based on the above mentioned information, officials of the Hood Museum of Art have determined, in consultation with representatives of the Tetlin Native Corporation, that, pursuant to 43 CFR 10.2 (d)(1), the human remains listed above represent the physical remains of one individual of Native American ancestry. Officials of the Hood Museum of Art have also determined that, pursuant to 25 U.S.C. 3001 (3)(A), the thirty five objects listed above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Hood Museum of Art have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity which can be reasonably traced between these Native American human remains and associated funerary objects and the Tanana of Tetlin Village, Alaska.

This notice has been sent to officials of the Tetlin Native Corporation and the Tanana Chiefs Conference. Representatives of any other Indian tribe that believes itself to be culturally affiliated with these human remains and associated funerary objects should contact Kellen G. Haak, Registrar and repatriation Coordinator, Hood Museum of Art, Dartmouth College, Hanover, NH 03755; telephone: (603) 646–3109, before June 3, 1996. Repatriation of the human remains and associated funerary objects to the Tetlin Native Corporation may begin after that date if no additional claimants come forward.

**Notice of Inventory Completion for  
Native American Human Remains in  
the possession of the Washington  
State Historical Society, Tacoma, WA**

**AGENCY:** National Park Service

**ACTION:** Notice

Notice is hereby given under the Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003(d), of the completion of an inventory of Native American human remains currently in the possession of the Washington State Historical Society, Tacoma, WA.

A detailed inventory and assessment has been made by the Washington State Historical Society staff and representatives of the Puyallup Tribe of Indians of Washington.

The human remain consists of one isolated skull from a male, 20 to 30 years of age which was recovered near Rodondo, Washington. The skull was donated to the museum in 1930 by Dr. W. T. Thomas of Tacoma, Washington. A second skull from a male, 35 to 45 years, was recovered in 1908 on the Puyallup Indian Reservation. This skull was donated to museum's possession in 1915 by C. Arthur Foss of Tacoma, Washington. No known individuals were identified.

Redondo, WA is within the boundaries of the original Puyallup reservation as defined in the Medicine Creek Treaty of 1854. Robert Hunt in "Tacoma, Its History and its Builders, A Half a century of Activity", 1916, identifies the Puyallup as occupying of the area for " \* \* \* unnumbered centuries, \* \* \* ". Archeological evidence is consistent with long uninterrupted occupation of the area.

Based on the available records as well as ethno-historical and geographical evidence reviewed by the Tribe during consultation, officials of the Washington State Historical Society have determined that, pursuant to 43 CFR 10 (d)(1), the human remains listed above represent the physical remains of two individuals of Native American ancestry. Officials of the Washington State Historical Society have determined that, pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity which can be reasonably traced between the human remains and the Puyallup Tribe of Indians of Washington.

This notice has been sent to Puyallup Tribe of Indians of Washington. Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains should contact Lynn D. Anderson, Head of Collections, Washington State Historical Society, 315 N. Stadium Way,

Tacoma, WA 98403, telephone (206) 597–4232, before June 3, 1996.

Repatriation of the human remains to the Puyallup Tribe may begin after that date if no additional claimants come forward.

Dated: April 26, 1996
